

AMENDMENTS TO THE ABSTRACT

Please substitute the following paragraph for the abstract now appearing in the currently filed specification:

Data representing the characteristics of a honeycomb CCD are stored on a ROM. The image of a subject is sensed by the honeycomb CCD and image data representing the image of the subject is recorded on a memory card. The data representing the characteristics of the honeycomb CCD is read out of the ROM and is recorded on the memory card in association with the image data. ~~When an image is reproduced, correction of the image data can be performed comparatively accurately utilizing the characteristics data.~~
